

What is claimed is:

1. An E-mail system comprising:
 - a receiving device receiving transmission
5 information transmitted from a sender to a plurality
of receivers;
an emphasizing device emphasizing and
highlighting the transmission information for each
receiver, and preparing E-mail information for each
10 receiver; and
a transmitting device transmitting the E-mail
information for each receiver.
2. The E-mail system according to claim 1, wherein
15 the receiving device receives a part of the transmission
information that the sender designates and information
about a corresponding transmission destination, and the
emphasizing device emphasizes and highlights the
designated part and prepares E-mail information for a
20 receiver corresponding to the transmission destination.
3. The E-mail system according to claim 1, further
comprising a storing device storing keyword information
predetermined for each receiver, wherein
25 the emphasizing device emphasizes and highlights

a part including the keyword information when the keyword information is included in the transmitted information, and prepares E-mail information for a receiver corresponding to the keyword information.

5

4. A terminal apparatus comprising:

a transmitting device transmitting transmission information prepared for a plurality of receivers; and

an indication device indicating E-mail
10 information that emphasizes and highlights the transmission information for each receiver, to be sent to each receiver.

5. A computer-readable recording medium recording a
15 program causing a computer to perform:

receiving transmission information from a sender to a plurality of receivers;

emphasizing and highlighting the transmission information for each receiver;

20 preparing E-mail information for each receiver;

and

transmitting the E-mail information for each receiver.

25 6. An E-mail transmitting method comprising:

preparing transmission information to be
transmitted from a sender to a plurality of receivers;
emphasizing and empahsizing the transmission
information for each receiver;

5 preparing E-mail information for each receiver;
transmitting the E-mail information for each
receiver; and

emphasizing and displaying the transmission
information for each receiver.

10

7. An E-mail system comprising:

receiving means for receiving transmission
information transmitted from a sender to a plurality
of receivers;

15 emphasizing means for emphasizing and emphasizing
the transmission information for each receiver, and
preparing E-mail information for each receiver; and

transmitting means for transmitting the E-mail
information for each receiver.

20

8. A propagating signal propagating a program for a
computer to the computer, said program causing the
computer to perform:

receiving transmission information transmitted
25 from a sender to a plurality of receivers;

emphasizing and highlighting the transmission
information for each receiver and preparing E-mail
information for each receiver; and

transmitting the E-mail information for each
5 receiver.
